# FHIR R5 Release

- 26. mars 2023

The screenshot shows the HL7 FHIR Release 5 website. At the top is the HL7 FHIR logo and 'Release 5'. A navigation bar includes links for Home, Getting Started, Documentation, Data Types, Resource Types, Terminologies, and Art. Below this is a breadcrumb trail: Table of Contents > Resources. A yellow banner states: 'This page is part of the FHIR Specification (v5.0.0: R5 - STU). This is the current published version. Page versions: R5 R4B R4 R3 R2'. The main heading is '1.1 Resource Index'. Below it, there are links for 'FHIR Infrastructure' and 'Work Group'. A cross-reference section lists 'Types Framework Cross Reference: Base Types | Datatypes | Resources | Patients'. A paragraph explains the page's purpose: 'This page is provided to help find what you are looking for quickly - there are...'. At the bottom, there are tabs for 'Categorized', 'Alphabetical', 'R2 Layout', 'By Maturity', and 'Security Category'. The 'Categorized' tab is active, showing three columns: 'Conformance' (CapabilityStatement N, StructureDefinition N, ImplementationGuide 4, SearchParameter 5), 'Terminology' (CodeSystem N, ValueSet N, ConceptMap 3, NamingSystem 4), and 'Security' (Provenance 4, AuditEvent 4, Permission 0, Consent 2).

# Participation!

- Meeting details and agenda
  - <https://hl7norway.github.io/best-practice/docs/FHIR-faglig-forum/>
- Want to present something?
  - <https://github.com/HL7Norway/best-practice/issues/56>
- Open discussion on the FHIR chat
  - <https://chat.fhir.org/#narrow/stream/179226-norway>

# Agenda

1. Intro and HL7 Norway Thomas T Rosenlund & Øyvind Aassve (5 min)
2. Gravitare health intro, Anne Moen, UiO (5 min)
3. FHIR resources used in Gravitare-Health; IGs and opportunities from participation in HL7 accelerators to expedite transition - Craig Anderson Pfizer and Catherine Chronaki, HL7 Europe (25 min)
4. Collaboration activities to populate EU ePI Common Standard (where HL7 ePI IG plays a role) - contributions by Adam Kover, Felleskatalogen, CAPABLE and Gravitare-Health (25 min)
5. CAPABLE use of HL7 FHIR, including EU ePI Common Standard to support Gravitare-Health testing scenarios Petter Hurlen, AHUS and Knut Skifjeld, Norsk e-helse (25 min)
6. Open DIPS: An open developer sandbox for digital healthcare innovations, Bjørn Fjukstad, DIPS (25 min)
7. Eventuelt og diskusjon (10 min)
