Docs

Hey there! 🙌

Thanks for checking out our API documentation. We're excited to see what you build with it!

The DIPS APIs are organized mainly around REST, with intuitive resource-centric URLs. Many of our APIs follow popular standards such as **FHIR**, but we also provide specialized APIs tailored to specific use cases. On this page you can browse our APIs, read their documentation and try them out.

Just getting started?

SMART on FHIR

Historie i DIPS

2019

Oppsummert anbefaling

Direktoratet for e-helse anser SMART on FHIR som et av de mest lovende nye rammeverkene for applikasjonsintegrasjon i helseinformasjonssystemer, og anbefaler leverandører og andre aktører å ta i bruk dette rammeverket.

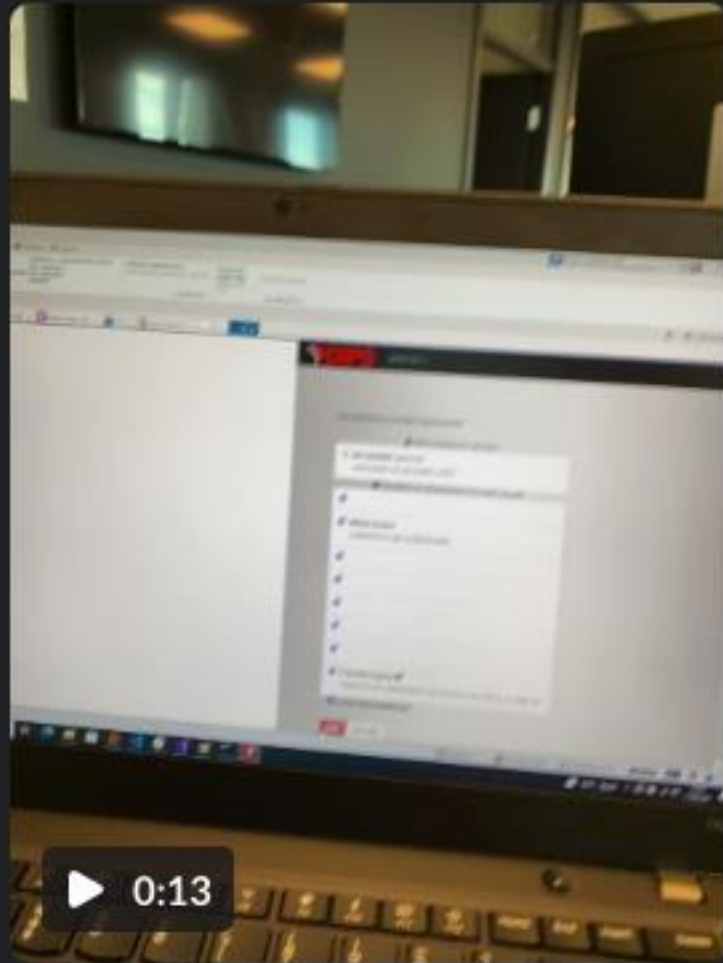

2021

Thor Stenbæk Aug 17th, 2021 at 15:19

Kjørende SMART on **FHIR** i DIPS Arena! 😊

RETINARISK Acumentra

Low Risk of Retinopathy
You have a low risk of developing sight-threatening retinopathy.

Next screening: 09/2021
Screening interval: 10 months

HbA1c
Your HbA1c levels are elevated. Speak to a healthcare professional about how to reduce your HbA1c in order to decrease the risk of diabetic complications.
Score: 58 (mmol/mol)

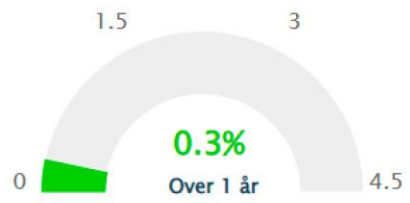

Blood pressure
According to these values you might have stage 1 hypertension. Speak to your physician about what to do when your blood pressure is lower, as it is important to help decrease the risk of diabetic complications.

Diabetes Duration
Your risk of developing sight-threatening retinopathy is impacted by your duration of your diabetes. The risk duration increases the need for better eye care retinal care.

Inputs:
HbA1c: 58 (mmol/mol)
Blood Pressure: 120/80 (mmHg)
Diabetes Duration: 10 (years)

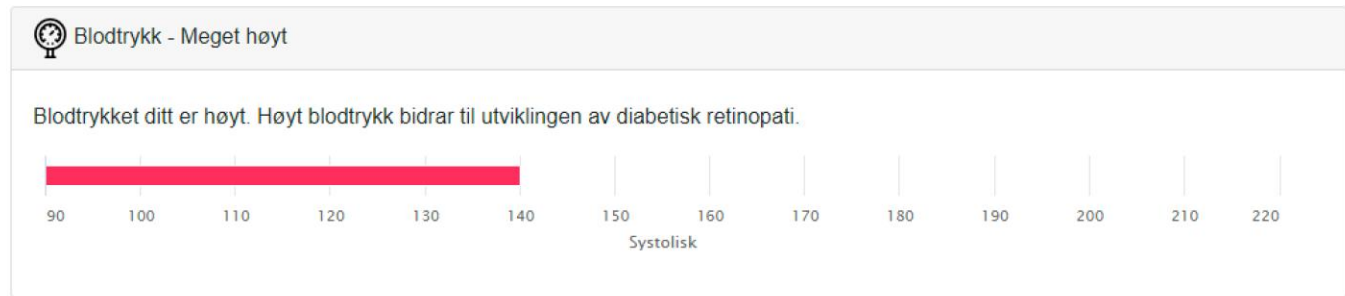

Output:
Risk Level: Low
Next Screening: 09/2021
